PROFESSIONAL PROFILE

I'm Kendall, a D.C. transplant by way of California. I came here for school, graduated with a degree in Mathematics, but most recently took the Front End Web Development course at General Assembly. I found that coding is truly what I love! Since then, I've banded with a group of like-minded individuals who also fell in love with coding the way I did, and we've been working on a React-based blog. My favorite parts of coding and programming involve build tools, Git, and anything CSS related. Because I like organization, I'm a firm believer in semantic HTML and clean (*ahem* *indented*) code!
